

IRMP 2 Action Plan 3 Responses

Deb Appleton raised the point that a Value For Money action point needed to be included in the final document

Paul Woods, Senior Technical Consultant, The Fire Protection Association, had no specific comments but wished to be consulted on any changes to staffing levels and weight of attack.

Bruce McGlashan, Technical Advisor, Environmental Agency, welcomed our flood protection plans and our review of our carbon efficiency as an organisation.

The agency also noted our proposals on post incident hazmat disposal and would welcome a commitment and action plan to mitigate pollution at fires and spillages building on the good work we already do in this area.
