1 Overview

1.1 Asset Management

This is our Property Asset Management Plan 2017 /2022 which supersedes the 'Property Asset Management Plan 2016 /2021, following our annual internal review.

The purpose of this Property Asset Management Plan is to provide clear guidance on the management of property assets, along with setting out guiding principles for our Property Asset Management Planning process.

Our Property Assets are important to the Authority's overall business as a base for operational staff, support staff, volunteers and advocates along with being a fundamental and integral part of our community work. Our properties provide a hub for community integration allowing the community to approach the fire and rescue service and they also provide a base for our community outreach work.

Effective asset management will provide assets that are sustainable, fit for purpose and provide value for money, to achieve this, we will

- Dispose of assets we no longer require
- Maintain, rationalise and develop the assets we keep
- Plan and acquire assets we require to meet operational needs

The Plan outlines the asset management process and guiding principles used to ensure the assets meet the current and future needs of Merseyside Fire and Rescue Authority, our staff and the communities we serve. It details the current position regarding key assets and sets out the key capital priorities and budget requirements to achieve them.

Despite being times of economic uncertainty the Authority has invested in modernising its estate over the last 5 years, with the ongoing austerity measures it remains vital for the Authority to implement best practice in the management of its land and buildings. It is anticipated that the proposals contained within this Plan can be implemented over the next five years improving and modernising our Property Assets where appropriate.

The plan integrates fully with the Authority's business and financial planning processes, with clear alignment between the asset plan and other service plans. It reflects the Authority's vision and takes cognisance of, and must be read in conjunction with the Integrated Risk Management Plan (IRMP).

1.2 Estates

The Estates Department are part of the strategic Change and Resource Function and are responsible for managing the property assets with an estate comprising of approximately 50,000m² of managed space located over 40 acres of land in the Merseyside region, which has a population of 1.4 million residents and spans 249 square miles (645km²). This incorporates 25 operational Fire and Rescue Stations and a further 19 non-operational support sites including a Marine Rescue Unit and 5 LLAR houses.

The department can be split into three key delivery areas

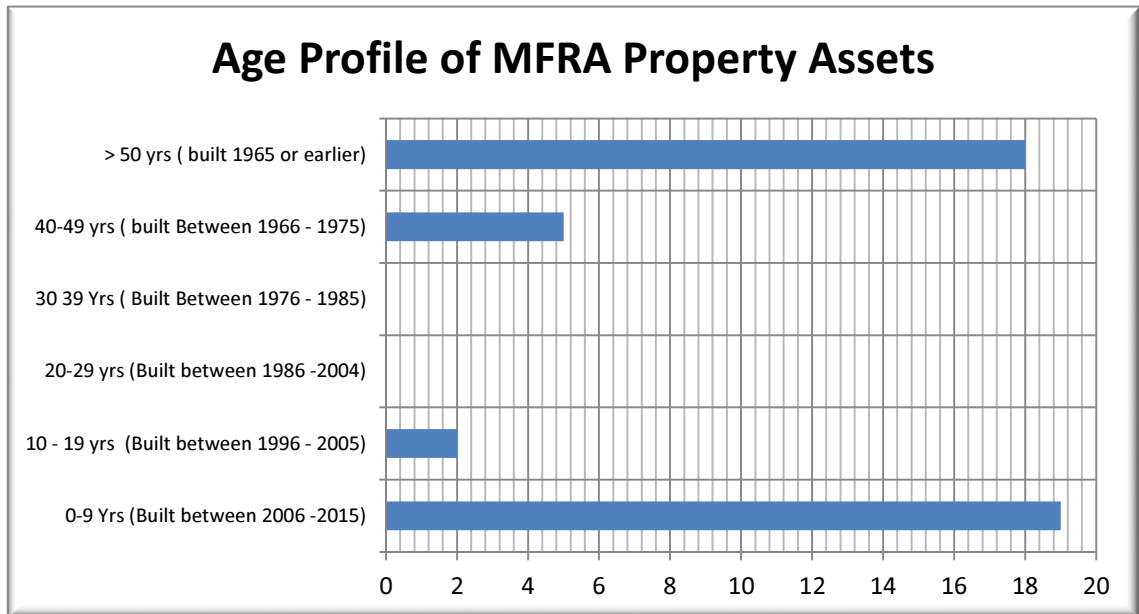

- Facilities Management – Bouygues Energies and services Ltd were awarded the five year contract to provide the Facilities service provision in July 2015, covering the following service lines - Cleaning, security, Reactive and Planned Maintenance, Helpdesk, condition monitoring, Waste, pest control, energy / environmental & Statutory compliance.
- Project Management – project management of all Major and minor capital build project are developed and managed within the department
- Private Funded Initiative (PFI) – Management of the 16 Northwest PFI built fire stations via Balfour Beatty.

During the last five years Asset Management period there has been significant investment and change to the Authority's property portfolio with the completion of:

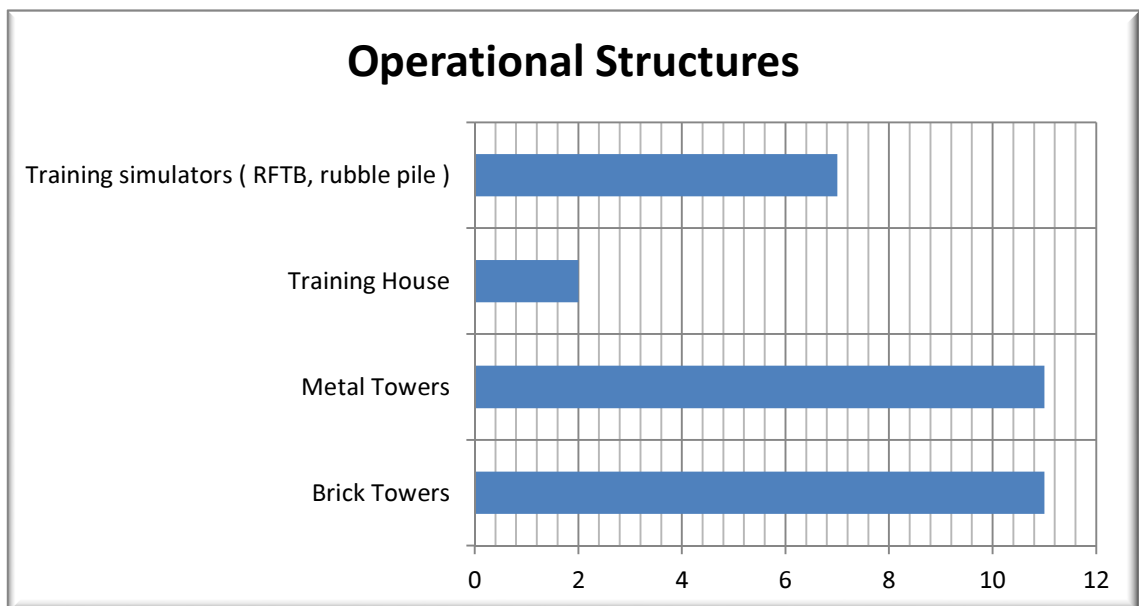

- Kensington Community Fire Station
- Marine Rescue Unit at the Pier Head
- 7 new PFI Stations :
- Bootle & Netherton Community Fire Station
- Southport Community Fire Station
- Formby Community Fire Station
- Belle Vale Community Fire Station
- Newton Le Willows Community Fire Station
- Birkenhead Community Fire Station
- Kirkdale Community Fire Station
- Toxteth Community Fire station & 'Fire Fit Hub' Youth Facility
- Joint Control Centre
- Refurbishment of Service Headquarters Building
- Donation of land adjacent to Birkenhead Fire station to Wirral borough Council to allow the construction of a Youth Hub

The Estate comprises of a mixture of Buildings dating back to 1926 with still over half the estate being greater than 40 years old. The historic nature of the estates means that many of the properties are old fashioned, lack community facilities and are unwelcoming to the local community. There is a high maintenance requirement associated with the older buildings which are oversized and environmentally inefficient; this clearly provides a challenge for the Estates

department managing a high level of backlog maintenance which also increases the levels of reactive works.

Within the property portfolio are operational structures used for Training of operational staff. Given the extremes of their individual uses many are short life assets and all require regular safety checks and maintenance.

MFRS manages a number of National Resilience assets for national and regional incidents of large scale nature; these assets require suitable storage and means to ensure they can be deployed quickly and effectively to any incident.

2 Property Aims & Objectives

The Property Asset Management Plan aims to deliver an efficient estate which is fit for purpose to achieve the Authority's Mission of Safer, Stronger Communities - Safe, Effective Fire fighters.

The Authority produces an Integrated Risk Management Plan (IRMP) that sets out the ways in which it deals with local risks and challenges. The IRMP updates stakeholders on the progress made against objectives and how it intends to deal with future challenges. The focus of the Asset Management Plan will be determined by the IRMP and as such will be reviewed in line with the IRMP.

The Property Asset Management objectives are to ensure our property assets provide:

- Excellent facilities to meet operational response requirements
- Excellent facilities to support prevention and protection work in the community.
- Excellent facilities which are resilient and adaptable.
- Buildings which are fit for purpose and provide a healthy environment for all our employees and stakeholders
- Value for money property solutions, maximising space utilisation by exploring opportunities for collaboration with partners and other similar authorities.
- Sustainable, environmental and energy considerate sites
- Safe sites, maintained in good condition, and compliant with current legislation
- Sites which are accessible to all and compliant with the Equalities Act (2010).
- BREEAM standard of 'very good' for all new builds.

3 Review of Current Property Assets

Property assets are an important resource in delivering efficient and effective services to our community, a fundamental aspect of any Asset Management Plan is accurate information of the property portfolio.

Property information for each property is held within the Estates department, this information and data is used to review and monitor our property performance on an annual basis. A snapshot of this data can be found in Appendix A – summary of property Assets

Following a successful tender process the new facilities management contract was awarded to Bouygues Energies and services in 2015, resulting in an asset condition survey being undertaken along with the implementation of a new computerised maintenance management system to record and manage asset condition and life cycle costs. A validation exercise on the current building assets has taken place as part of the Facilities Management contract with the information currently being uploaded onto the new computerised management system.

The purpose of the asset condition survey is to provide verification and condition of all Mechanical, Electrical and building fabric assets which are maintain across the MFRS Estate. Each asset is then assigned a condition code and priority based on industry best practice.

All property including premises and operational structures are subject to inspection and examination regimes. These vary, in frequency and content, by asset type to reflect their use, construction method, legal obligations and failure implications of the asset.

A quinquennial valuation report was completed in March 2015 which shown the property asset book value (land & buildings) to be £63m. This has decreased in line with depreciation, acquisitions and disposal. Book Value as of March 2016 is £60m

A number of Local Performance Indicators are monitored and reported monthly to manage the energy and environmental performance of our buildings.

- Carbon output of all buildings
- Electricity used by MFRS buildings divided by floor space
- Gas used by all MFRS buildings divided by floor space
- Water used by all MFRS buildings divided by floor space
- Waste generated per person per annum
- % of high risk (category 1 & 2) environmental incidents

Contract Management of the new facilities management contract and the PFI contract are fundamental to achieve effective asset management. Both contracts have a number of Key Performance Indicators linked to the Service Level Agreement which are reported and reviewed on a monthly basis.

4 Property Asset Management Strategy

The Estates department manage its assets effectively to help deliver its strategic priorities and service in line with the following Key principles.

- Prioritise work based on the following weighting
 - **'Health and safety'** – Urgent work that will prevent immediate closure of the premises and/or address an immediate high risk to Health and Safety of the occupants and / or remedy a serious breach of the legislation
 - **'Key Stations Methodology'** – Ten key stations have been identified that form the basis of MFRS operational cover model for our control room. By ensuring all 10 stations have an appliance in their station ground MFRA can meet its 10 minute response standard
 - **'Operational Requirements'** – The Authority will continue to review its shift patterns and duty systems in order to provide the most efficient and effective emergency response in Merseyside. The premises need to be flexible and fit for purpose for this service to be delivered.
- Explore opportunities for collaboration with partners, other similar blue light authorities.
- Create community fire stations flexible enough to provide excellent facilities to:
 - Meet the support staff and community requirements.
 - Establish more premises as Safe Havens
 - Which are accessible for all
 - Enable the Authority to build on their previous success of reducing anti –social behaviour and arson in the community
- Develop buildings which are sustainable, environmental and energy considerate and deliver real cost efficiencies to meet the financial challenges placed on the Authority.
- To provide a modern infrastructure and enable new ways of working to change the way we deliver services with our partners.
- To carry out ongoing review to provide properties which are fit for purpose, in a satisfactory condition, safe, accessible for people with disabilities and comply with relevant statutory requirements and financial reporting requirements.

Estates has a robust reporting process to provide systematic and timely reporting of compliance and performance to enable prompt asset-related decision making regarding Estates assets.

In conjunction with MFRS procurement both the PFI and FM contract have robust contract management and reporting procedure in place to ensure effective delivery of asset maintenance.

A project database is held within Estates which details projects currently being considered and those approved and under development, see Appendix B - Summary of Key Property Projects.

5 Property Asset Monitoring.

Effective Property Asset management requires a monitoring process to provide systematic and timely reporting of compliance and performance to enable prompt asset related decision making.

Monthly FM reports are produced on all MFRS properties to enable asset information, building performance and contractor's performance to be monitored and reviewed.

Information contained with the report:

- Health and Safety
- Energy consumption
- Reactive works
- Planned Maintenance activities
- Lifecycle costs
- Statutory compliance

For premises and operational structures environmental and other external factors have a significant impact on asset degradation. The constant heating and cooling cycle within training simulators is also a further major degradation aspect that must be considered. Each of these degradation effects can cause defects that may lead to a loss of stability or integrity. Action has to be taken to proactively monitor these assets and maintain and repair to ensure integrity is maintained. We manage asset degradation risk by a comprehensive inspection, Programmed maintenance and renewal regime.

All property including premises and operational structures are subject to inspection and examination regimes. These vary, in frequency and content, by asset type to reflect their use, construction method, Legal obligations and failure implications of asset.

- Structural inspection of training structures over a 5 year cycle
- Annual Inspection of Hot Fire training Units
- 5 yearly fixed electrical inspections
- Annual Portable appliance testing
- 5 yearly M & E asset condition surveys

- 5 yearly detailed Property / valuation condition survey
- Annual fitness equipment inspections
- Statutory inspections with frequencies ranging from 1 -5 years

A Major asset failure report is produced and reviewed with a view to establishing lesson learnt and to feed back into the planning process whenever a major property asset fails.

6 Property Asset Capital Spend Strategy

To manage the Property Asset investment process Estates classifies spend into four main categories:

- Upgrade Works
- Energy Conservation Works
- Major Site Refurbishments
- New Build

These are explained in the following table:

Property Assets Capital spend Matrix

	Spend	Why	Benefit
Upgrade works	Spend on the existing asset / Infrastructure e.g. upgrade of external lighting, replacing of floor coverings	This spend stops the assets / Infrastructure failing or becoming out of date	More than just 'keeping' the lights on. Ensure Assets and systems are robust, secure and resilient.
Energy Conservation Works	Projects that produce a reduction in energy costs. Help reduce and meet the authority's carbon commitment Use of LED lighting, installing Building management systems	This spend delivers value for money, innovation and savings where appropriate.	accommodating change with a focus on a sound business case and clear deliverables
Major Site Refurbishment works	Spend on Specific Projects where the Asset / premises is an enabler to change or becoming towards the end of it useful life. e.g. refurbishment of 30 year old station,	This spend delivers the Authority's IRMP	Safer, stronger communities; safe effective Fire fighters. Asset value increases

New Build	Spend on Specific New build projects	This spend delivers the Authority's IRMP	Protecting public safety and increasing resilience. New Asset value
-----------	--------------------------------------	--	--

The 5 year Property capital Budget for 2017 /2022 can be found in Authority Budget and Financial Plan 2017/2018 – 2021/2022.

The current new build strategy is based upon the proposed 3 station mergers project, these will be closely monitored and reviewed and plans amended in line with any Fire Authority decisions.

Appendix A – Summary of Property Assets

FIRE STATIONS					
ID	Property	Details			
10	Kirkdale Studholme St Liverpool	Date Of Construction	2013	Total Floor Area (m2)	1872
		No of Appliance Bays	3	Total Site Area (acres)	0.95

Appendix B – Summary of Key Property Projects

Location	Project	Project Status	Estimated Start Date	Estimated Completion Date
Prescot	Construction of a three bay fire station / training facility and Partner accommodation for Merseyside Police	Construction of New station started 28 th November 2016	Nov'16	March '18
Saughall Massie	Construction of a two bay fire station / training facility	Planning permission refused, review of plans	Aug`16	tbc
St Helens	Construction of a three bay fire station / training facility and Possibly partner accommodation for Merseyside Police	Feasibility stage / site investigation being undertaken	Aug 16	Aug 19
Newton Le Willows	Construction of a five bed LLAR house with blue light partner accommodation	Planning permission granted, tender process under way	Feb`16	Oct`17
Formby	Construction of a five bed LLAR house with blue light partner accommodation	Planning permission granted, tender process under way	Feb`16	Oct`17
SHQ	Upgrade to electrical supply capacity	Feasibility stage	tbc	tbc
Aintree	upgrade of station for day crewing arrangements, including new roof	Tender stage		April 17
Croxteth	Replacement of Appliance bay doors		Apr'17	Aug'17
TDA	Review of training facilities and the possible requirement of a high rise training scenario	Consultation		Apr'18
TDA / Croxteth	Review of accommodation / facilities for new recruits / day crew based staff	Feasibility	Feb'16	
Vesty 1	Construction of an internal 24 hr emergency store room	tender stage	Oct`15	Apr`17

Various stations	Construction of individual study rooms across 24/hr duty system station	Ongoing		Jun`17
Various stations	Adaptation to fire stations to meet current Equality Act. Provide access to all	Ongoing		Dec`17
Museum	Extension to the Heritage Museum	Feasibility		Dec`17
City Centre	Demolish Claire's building and construct training tower	planning permission granted		feb `17
Allerton	Disposal of site	ongoing		Mar`17
Heswall	Major Refurbishment	Feasibility	Oct`15	Mar`17
Kirkby	Major Refurbishment	Feasibility	Apr`16	Mar`17
Speke	Major Refurbishment	Feasibility	Apr`17	Mar`18
Old Swan	Major Refurbishment	Feasibility	Apr`17	Mar`18
Brombough	Major Refurbishment	Feasibility	Apr`16	Mar`17
Workshops	Feasibility study on a combined site with Merseyside police	Feasibility stage	Nov`16	Feb`17
All location	Review of security – access control and cctv provision	Specification design stage	Dec`16	April `18

Appendix C – 2017/2022 Build / Land Five Year Capital Programme

Type of Capital Expenditure	Total Cost £	2016/17 £	2017/18 £	2018/19 £	2019/20 £	2020/21 £	2021/22 £
Major Site Refurbishments							
BLD039 FS Refurbishment Heswall	375,000	50,000	300,000			25,000	
BLD041 FS Refurbishment Aintree	165,000	15,000		150,000			
BLD055 FS Refurbishment Bromborough	350,000		350,000				
BLD057 FS Refurbishment Crosby	150,000					150,000	
BLD063 FS Refurbishment Kirkby	375,000	25,000	350,000				
BLD070 Workshop Enhancement	248,000	248,000					
BLD071 Station Refresh	132,000	32,000	25,000	25,000	25,000		25,000
BLD076 FS Refurbishment Huyton	25,000		25,000				
BLD084 FS Refurbishment Croxteth	300,000		150,000		150,000		
BLD085 FS Refurbishment Speke/Garston	300,000	25,000	275,000				
BLD086 FS Refurbishment Old Swan	300,000	25,000	25,000	250,000			
BLD087 FS Refurbishment City Centre	150,000	150,000					
BLD088 FS Refurbishment Kensington	40,000	20,000	20,000				
BLD089 FS Refurbishment Toxteth/Hub - Fire Station	100,000				100,000		
BLD089 FS Refurbishment Toxteth/Hub - Hub Element	100,000				100,000		
BLD090 FS Refurbishment Wallasey	125,000		25,000				100,000
