### Introduction and Background

4. This report introduces the strategic plans which set out how the Authority will use its physical assets in an efficient and effective manner over the various life-cycles of the assets to support service delivery.
5. The asset management arrangements divide the Authority's physical resources into three broad areas;
  1. Buildings, land and contents

2. ICT (including risk critical applications)
  3. Transport / Vehicle fleet
6. The Asset Management Plan for each of the three areas set out the strategic goals for the asset portfolio by outlining what programmes will be delivered, the methods of programme delivery, and what assets and resources will be required.
7. The Asset Management Plans enable the practical implementation of the Authority's strategic goals and helps in identifying the optimal asset base that is necessary to support service delivery requirements.
8. The underlying principle in developing Asset Management Plans is that each asset will deliver future benefit to the Authority by supporting service delivery, whether directly or indirectly.
9. The Asset Management Plans also acknowledge that as employee numbers reduce it becomes increasingly important to ensure the provision of physical assets which fully enable staff to work in the most effective and productive way possible.
10. The Asset Management Plans should be viewed in conjunction with other strategic documents, in particular, the Capital Strategy and Capital Programme, supporting and informing the Financial Strategy and the budget for 2019/20 to 2023/24.
