1 Overview

1.1 Asset Management

This is our Property Asset Management Plan 2025/2030. It supersedes the 'Property Asset Management Plan 2024/2029, following our annual internal review.

The purpose of this Property Asset Management Plan is to provide clear guidance on the management of property assets, along with setting out guiding principles for our Property Asset Management Planning process.

Our property assets are important to the Authority's overall business as a base for operational staff, support staff, volunteers, and advocates along with being a fundamental and integral part of our community work. Our properties provide a hub for community integration allowing the community to approach the fire and rescue service and they provide a base for our community outreach work.

Effective asset management will provide assets that are sustainable, fit for purpose and provide value for money. To achieve this, we will

- Dispose of assets we no longer require
- Maintain, rationalise and develop the assets we keep
- Plan and acquire assets we require to meet operational needs

The plan outlines the asset management process and guiding principles used to ensure the assets meet the current and future needs of Merseyside Fire and Rescue Authority, our staff and the communities we serve. It details the current position regarding key assets and sets out the key capital priorities and budget requirements to achieve them.

Despite being in times of economic uncertainty, the Authority has invested in modernising its estate over the last 10 years. With the ongoing budget challenges, it remains vital for the Authority to implement best practice in the management of its land and buildings. It is anticipated that the proposals contained within this Plan can be implemented over the next five years improving and modernising our Property Assets where appropriate.

The Plan integrates fully with the Authority's business and financial planning processes, with clear alignment between the Asset Plan and other service plans. It reflects the Authority's Vision and takes cognisance of, and should be read in conjunction with the current Community Risk Management Plan (CRMP) 2024/27.

1.2 Estates

The Estates Department are responsible for managing the Authority's property assets, with an estate currently comprising of approximately 42,000m² of managed space located over 39 acres of land in the Merseyside region, which has a population of some 1.4 million residents and spans 249 square miles (645km²). This incorporates 21 operational Fire and Rescue Stations and a further 10 non-operational support sites including a Marine Rescue Unit and three houses used by firefighters who work our Low Level of Activity and Risk (LLAR) duty system.

The department can be split into three key delivery areas

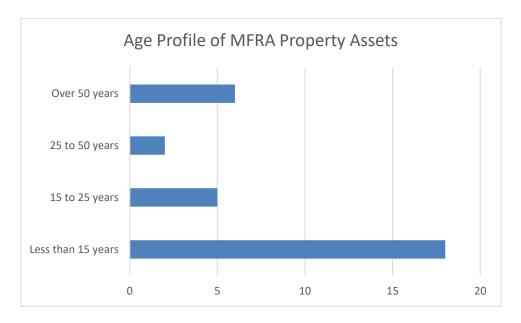

- Facilities Management Equans (formerly known as Bouygues) were awarded a new five-year contract to provide the facilities service provision in September 2022, covering the following service lines - cleaning, security, reactive and planned maintenance, Helpdesk, condition monitoring, waste, pest control, energy/environmental and statutory compliance.
- Project Management project management of all major and minor capital build project are developed and managed within the department.
- Private Finance Initiative (PFI) management of the 16 North West PFI fire stations built by Balfour Beatty (seven in Merseyside; four in Lancashire and five in Cumbria).

During the last ten years, there has been significant investment and changes to the Authority's property portfolio with the completion of:

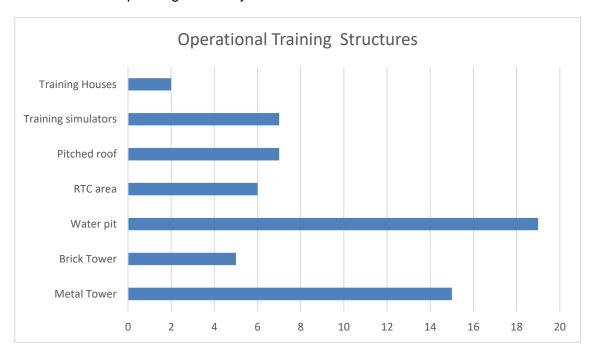

- · Refurbishment of Service Headquarters building
- Donation of land adjacent to Birkenhead Fire Station to Wirral Borough Council to allow the construction of a Youth Hub
- Emergency Stores Vesty Road
- Prescot Community Fire and Police Station
- Saughall Massie Community Fire Station
- New St Helens Community Fire Station
- New Formby LLAR house
- Refurbishment of Heswall Community Fire Station
- New LLAR House in Newton Le Willows
- Refurbishment of Speke and Garston Community Fire Station
- Refurbishment of Old Swan Community Fire Station
- Construction of a new multi pump Aintree community station, Training and Development Academy and National Resilience Centre of Excellence
- Refurbishment of Bromborough Community Fire Station

As a result of these works, much of the Estate has been refreshed or completely replaced during the last decade but there is still a mixture of buildings dating back to 1940's. The historic nature of the older estate means that some of the properties are old fashioned, lack community facilities and are unwelcoming to the local

community. Although the number of older stations is reducing as a result of recent Authority investment, there is a high maintenance requirement associated with the older buildings, which are both oversized and environmentally inefficient, with a requirement to ensure compliance with the Equality Act 2010 in relation to accessibility; this clearly provides a challenge for the Estates department managing a high level of backlog maintenance, which also increases the levels of reactive works.

Within the property portfolio are operational structures used for training of operational staff. Given the extremes of their individual uses, many are short life assets and all require regular safety checks and maintenance.

MFRA manages a number of National Resilience assets for national and regional incidents of large scale nature; these assets require suitable storage and the means to ensure they can be deployed quickly and effectively to any incident.

2 Property Aims & Objectives

The Property Asset Management Plan aims to deliver an efficient estate, which is fit for purpose to achieve the Authority's Vision; To be the best Fire & Rescue Service in the UK.

The Authority publishes a Community Risk Management Plan (CRMP) that sets out the ways in which it deals with local risks and challenges and improves services to the public. The CRMP updates stakeholders on the progress made against objectives and how it intends to deal with future challenges. The focus of the Asset Management Plan is determined by the CRMP and as such will be reviewed in line with the CRMP.

The Property Asset Management objectives are to ensure our property assets provide:

- Excellent facilities to meet operational response requirements.
- Excellent facilities to support prevention and protection work in the community.
- Excellent facilities which are resilient and adaptable.
- Buildings which are fit for purpose and provide a healthy environment for all our employees and stakeholders
- Value for Money property solutions, maximising space utilisation by exploring opportunities for collaboration with partners and other similar authorities.
- Sustainable, environmental and energy considerate sites.
- Safe sites, maintained in good condition, and compliant with current legislation.
- Sites which are accessible to all and compliant with the Equality Act 2010.
- To achieve the Building Research Establishment Environmental Assessment Method 'BREEAM' standard of 'very good' for all new builds.

3 Review of Current Property Assets

Property assets are an important resource in delivering efficient and effective services to our community. A fundamental aspect of any Asset Management Plan is accurate information about the property portfolio.

Property information for each property is held within the Estates Department, this information and data is used to review and monitor our property performance on an annual basis. A snapshot of this data can be found in Appendix A – Summary of Property Assets.

The facilities management contract awarded to Equans in 2015 was re let under the Fusion 21 framework and awarded again to Equans and Services in September 2022 for a further five-year contract. An asset condition survey was undertaken along with updating the computerised maintenance management system used to record and manage asset condition and life cycle costs.

The purpose of the asset condition survey is to provide verification and information about the condition of all mechanical, electrical and building fabric assets which are maintained across the MFRA Estate. Each asset is then assigned a condition code and priority based on industry best practice.

All property, including premises and operational structures, is subject to inspection and examination regimes. These vary in frequency and content, by asset type to reflect their use, construction method, legal obligations and failure implications of the asset.

A property valuation report was completed in March 2023 which showed the property asset book value (land and buildings) to be £103m. This has increased in line with deprecation, acquisitions, revaluations and disposals to a Book Value at March 2024 of £134m.

A number of Local Performance Indicators are monitored and reported monthly to manage the energy and environmental performance of our buildings.

- Carbon output of all buildings
- Electricity used by MFRA buildings divided by floor space
- Gas used by all MFRA buildings divided by floor space
- Water used by all MFRA buildings divided by floor space
- Waste generated per person per annum

Contract management of the facilities management contract and the PFI contract are fundamental to achieve effective asset management. Both contracts have a number of Key Performance Indicators linked to the Service Level Agreements which are reported and reviewed on a monthly basis.

4 Property Asset Management Strategy

The Estates department manage MFRA assets effectively to help deliver against strategic priorities and services in line with the following key principles.

- Prioritise work based on the following weighting:
 - Health and Safety Urgent work that will prevent immediate closure of the premises and/or address an immediate high risk to Health and Safety of the occupants and/or remedy a serious breach of the legislation
 - **Key Stations Methodology** 10 key stations have been identified that form the basis of MFRA operational cover model for our control room. By ensuring all 10 stations have an appliance in their station ground, MFRA can meet its 10 minute response standard for life risk incidents on 90% of occasions
 - Operational Requirements The Authority will continue to review its shift patterns and duty systems, in order to provide the most efficient and effective emergency response in Merseyside. The premises need to be flexible and fit for purpose for this service to be delivered.
- Explore opportunities for collaboration with partners, particularly other similar blue light authorities.
- Create community fire stations flexible enough to provide excellent facilities to:
 - Meet the support staff and community requirements
 - Establish premises as Safe Havens
 - Be accessible for all
 - Enable the Authority to build on their previous success of reducing anti -social behaviour and arson in the community.
- Develop buildings which are sustainable, environmental and energy considerate and deliver real cost efficiencies to meet the financial challenges placed on the Authority and their commitment to meet 'Net Zero' by 2040.
- To provide a modern infrastructure and enable new ways of working to change the way we deliver services with our partners.
- To carry out ongoing review to provide properties which are fit for purpose, in a satisfactory condition, safe, accessible for all users and comply with relevant statutory requirements and financial reporting requirements.

The Estates Department has a robust reporting process to provide systematic and timely reporting of compliance and performance to enable prompt asset-related decision-making regarding Estates assets.

In conjunction with the MFRA Procurement Team, both the PFI and FM contract, have robust contract management and reporting procedures in place to ensure effective delivery of asset maintenance.

A project database held within the Estates Department details the projects currently under consideration; those approved and those currently under development, see Appendix B - Summary of Key Property Projects.

5 Governance

The Estates function is part of the Strategy and Performance Directorate (S&P). The S&P Board (Estates) oversees the development of land and property assets and delivery against the CRMP. The overall function of the Board is to enable the use of land and property assets to facilitate and drive transformation.

The Board is accountable for the successful development and delivery of the Estate programmes.

The Board has responsibility for:

- Implementing the strategic direction for land and property set by MFRA.
- Supporting the duty to collaborate with partners in both development and estate disposal programmes.
- Approving bid submissions, defining and realising benefits, managing strategic risks, quality, budgets and timelines, making and resourcing decisions, taking account of environmental considerations and assessing requests for changes to the scope of the programme and any complementary initiatives.

The Board will approve the remit of the Estates Team (Head of Estates and any additional support including consultancy support), which has the primary purpose of managing programmes and individual projects (Programme) in line with the Board's direction.

The role of the Board is to oversee *Programme direction:*

- Agree the programme scope and any changes to scope during the course of the programme.
- Provide overall direction for the programme team and agree the scope for each stage of the programme.
- Report any major changes to programme deliverables or timescales.
- Address and resolve tensions between partners and objectives during the programme lifecycle.

In addition, Programme management:

- Ensure that the required resources are committed for the programme team.
- Request the initiation of a major capital project via Strategic Leadership Team (SLT).
- Sign off each stage or exception plan of the programme.
- Authorise the closure of a project or programme.

In addition, programme delivery:

- Oversee the Authority's approach to managing assets Including:
 - Ensuring that assets are managed in the most effective way to drive forward growth.
- support the delivery of service transformation and unlock significant efficiency savings.
- Ensuring alignment with any asks of government.
- Preparing local plans and partnerships to drive collaboration at the local level.
- Prepare, review and monitor the Service and Asset Management Plan for MFRA.
- Sign off funding submissions.

Funding:

- Ensure financial administration of any programme is consistent with the terms and conditions required by the Authority / Home Office and any other funders and by the authority's financial regulations.
- Seek to identify other opportunities for project funding.

Reporting:

- Monitor and evaluate the process and outcomes and benefits from any programme.
- Ensure reporting of progress, outcomes and benefits achieved, as required to, SLT, MFRA, Home Office, and other stakeholders.
- The Strategy and Performance Board (Estates) may delegate its duties as it sees fit.

6 Property Asset Monitoring

Effective Property Asset management requires a monitoring process to provide systematic and timely reporting of compliance and performance to enable prompt asset related decision making.

Monthly FM reports are produced on all MFRA properties to enable asset information, building performance and contractor's performance to be monitored and reviewed.

Information contained with the report includes:

- Health and Safety
- Energy consumption
- Reactive works
- Planned maintenance activities
- Lifecycle costs
- Statutory compliance

For premises and operational structures, environmental and other external factors have a significant impact on asset degradation. The constant heating and cooling cycle within training simulators is also a further major degradation aspect that must be considered. Each of these degradation effects can cause defects that may lead to a loss of stability or integrity. Action has to be taken to proactively monitor these assets and maintain and repair to ensure integrity is maintained. We manage asset degradation risk by a comprehensive inspection, programmed maintenance and renewal regime.

All property, including premises and operational structures, are subject to inspection and examination regimes. These vary, in frequency and content, by asset type to reflect their use, construction method, legal obligations and failure implications of assets.

- Structural inspection of training structures over a 5-year cycle
- Annual Inspection of Hot Fire Training Units
- 5 yearly fixed electrical inspections
- Annual portable appliance testing
- 5 yearly Mechanical & Electrical asset condition surveys
- 5 yearly detailed property/valuation condition surveys
- Annual fitness equipment inspections
- Statutory inspections with frequencies ranging from 1-5 years

A major asset failure report is produced and reviewed to establish lessons learned and to feed back into the planning process, whenever a major property asset fails.

7 Property Asset Capital Spend Strategy

To manage the Property Asset investment process Estates Department classifies spend into four main categories:

- Upgrade works
- Energy conservation works
- Major site refurbishments
- New build

These are explained in the following table:

Property Assets Capital spend Matrix

| | Spend | Why | Benefit |
|--------------------------------------|--|--|---|
| Upgrade works | Spend on the existing asset / Infrastructure e.g. upgrade of external lighting, replacing of floor coverings | This spend stops the assets/Infrastructure failing or becoming out of date | More than just 'keeping' the lights on. Ensures assets and systems are robust, secure and resilient. |
| Energy Conservation Works | Projects that produce a reduction in energy costs. Help reduce and meet the authority's carbon commitment including the use of LED lighting, installing building management systems | This spend delivers value for money, innovation and savings where appropriate. | Accommodating change with a focus on a sound business case and clear deliverables. |
| Major Site Refurbishment works | Spend on specific projects where the asset/premises is an enabler to change or becoming towards the end of its useful life. e.g. refurbishment of 30-year-old station. | This spend delivers the Authority's CRMP. | To be the best Fire & Rescue Service in the UK. Asset value increases. |
| New Build | Spend on specific new build projects. | This spend delivers the Authority's CRMP. | Protecting public safety and increasing resilience. New asset value. |

The 5-year Property capital budget for 2025/2030 can be found in appendix C – 5-year capital programme but a summary is provided below.

Following a review of the Training and Development Academy facility a new site 12-acre site within Merseyside was acquired in 2022. Full Planning approval was achieved in Aug 2022 with construction works starting on site in late 2022 and was completed in May 2024. The New Training and Development Academy and a new Aintree fire station have replaced the existing ageing facilities at Croxteth and Aintree.

Major refurbishment works started in November 2024 at Bromborough Community Fire Station and are due for completion March / April 2025.

Further major refurbishment works are planned for:

- Kirkby Community Fire Station in 2025/26
- Wallasey Community Fire Station 2026/27

In line with the Authority's commitment to achieving Net Zero by 2040, a review of alternative fuel vehicles has commenced, with a view to have the critical infrastructure in place before 2040.

A full detailed access audit of all the Authority's properties was completed in 2021/22. A new Building Accessibility Reference Group was formed to consider the recommendations from the audit and provides ongoing support to the Estates Team. All the actions have been prioritised and are being implemented within the current plans for building maintenance, refurbishment and replacement.

A route map to deliver Net Zero carbon emissions was completed in 2022, a strategic working group is in place and action plan has been developed. The Estates Department is working with other departments to deliver the action plan.

Appendix A – Summary of Property Assets

| | | EIDE CTATIONIC | | | |
|----|---|--|-----------|---|--------------|
| ID | Property | FIRE STATIONS | | Details | |
| 10 | Kirkdale Studholme St Liverpool | Date Of Construction No of Appliance Bays | 2012 3 | Total Floor Area (m2) Total Site Area (acres) | 1872 0.95 |
