The purpose of undertaking an equality impact analysis and assessment is to understand the potential and/or actual impact that a service or policy may have on protected groups within the Equality Act (2010). The protected groups are:

- Age
- Disability
- Gender reassignment
- Marriage and civil partnership
- Pregnancy and maternity
- Race
- Religion and / or belief
- Sex (gender)
- Sexual orientation
- Socio-economic disadvantage (Although not one of the 9 protected groups MFRA recognise that Socio-economic disadvantage affects many deprived communities within Merseyside.)

People who are protected from discrimination on the basis of any of these characteristics are described in this document as belonging to one or other “protected group”. In addition, equality analysis can be applied to groups of people not afforded protection by the Equality Act, but who often face disadvantage and stigma in life in general and when trying to access services & employment opportunities. Such groups include homeless people, sex workers, people who misuse drugs and other groups who experience socio economic disadvantage & others. This

template has been developed following consultation with staff and other external stakeholders including reference to the National Fire Chiefs Councils (NFCC) [equality impact assessment toolkit](#) as well as the [Maturity Models and Workforce Good Practice Frameworks](#) developed by the NFCC which MFRS will use to underpin EIAs as wider work on improvement.

MFRS have also created the [ED&I Assurance Checklist](#), which is a useful outline of ED&I factors that staff need to consider to help demonstrate minimum legal compliance, making the most of ED&O opportunities and minimising risk for the organisation. This checklist can be used when preparing plans, discussing new services and organisational change.

Impact Analysis		
1	What evidence have you used to think about any potential impact on particular groups? (Please highlight any evidence that you have considered to help you address what the potential impact may be) Also include an introduction here giving background the purpose of the Policy, SI etc. that is being assessed. (A good place to start is the introduction and purpose of the document) Example evidence: • ONS Census data • Regional or local demographic information • MFRS reports & data • NFCC Reports/Guidance • Home office/Local government Reports • Risk Assessments • Staff survey results • Research / epidemiology studies • Updates to legislation • Engagement records or analysis NFCC Equality of Access documents – We encourage you to click on the following link to	The Gov.uk document “A guide to inclusive social research practices” has been used in the preparation of the CRMP mid-term consultation. This includes reference to the approach to be taken to research design, collecting data and conducting analysis (with supporting research). The planned focus group will be selected to be representative of the community as part of the process. The community engagement meeting will be attended by representatives of many different community groups who will be in a position to represent the interests of their communities. Regarding the CRMP update document, every attempt is already made to provide documents in plain English but one key decision taken as a result of considering this guidance is the provision of an easy read version of the CRMP update document. Digital exclusion in particular was considered in the preparation of the CRMP mid-term consultation process, as Merseyside Fire and Rescue Service (‘MFRS’) is already aware that its most at-risk residents are older and more socially deprived; factors which also have an impact on digital inclusion/exclusion. The report below was considered: barriers_digital_inclusion_cheshire_merseyside.pdf

	access a series of 'equality of access documents', developed by the National Fire Service Council (NFCC) & reference the data and information highlighted. Some aspects of these documents will help you provide information, awareness, and data to support: • Community Risk Management Plans • Service delivery strategies • Positive action and recruitment plans • Workforce improvement plans • Community engagement activities • and, will prompt conversations within the workplace. Each document provides a significant amount of data and information, including research undertaken and risk-based evidence, and then goes into some ideas for actions which Services can use based on the information and their individual circumstances	In that research the NHS carried out both online and street surveys with the results as follows: • The street survey respondents were predominantly elderly with 79% aged 65 and over. In contrast, the online survey sample returned a mixed age range of responses, with a larger portion being from a younger age demographic. • Technology and Internet access varied significantly between survey samples. Only 30% of those completing the street survey had access to the Internet at home, with a large proportion (96%) admitting they were not confident in accessing the Internet. In contrast, 99% of those who responded to the online survey had access to the Internet, with only 12% not feeling they were confident in accessing the Internet. • Those completing the street survey were more likely to live alone, heightening the risk of social isolation and potentially impacting their ability to access digital help and support. • 66% of those completing the street survey also had long term health conditions, with 20% requiring care and support. These figures were slightly higher than the online survey sample. Considering these findings in the design of the consultation resulted in a decision to provide a hard copy document (during MFRS visits to homes and businesses) plus options to provide feedback in writing as well as online options.	
2	Do you have all the evidence you need in order to make an informed decisions about the potential impact? (Please tick)	Yes ☒ If you feel that you have enough evidence, then you will not need to undertake any engagement activity	No ☐ If you feel that you do not have enough evidence to make an informed decision then you will need to undertake engagement activity with the staff or members of the public as applicable

3	What engagement is taking place or has already been undertaken to understand any potential impact on staff or members of the public? Examples include: <u>Public</u> • Interviews • Focus groups • Public Forums • Complaints, comments, compliments <u>Staff</u> • Staff events / workshop • Existing staff meetings / committees • Staff Networks • Representative Bodies • Annual Staff Survey questions		
4	Will there be an impact against the protected groups as described in the Equality Act (2010)? Summarise what impact there may be against each of the protected groups. Embed or provide a hyperlink to any reports or electronic files to which you are referring. Please remember when considering any possible impacts, these may be positive or negative and that there may be different impacts for our own staff when compared to those possible impacts on members of the community. Please detail clearly if the impacts are for staff or the wider community. It is also important to note that there may not be an impact on some of the protected groups if this	What is the actual or potential impact on age? There was the potential for older people to be excluded from the consultation if it was entirely online because they are less likely to have access to the necessary technology. This has been addressed by the inclusion of hard copy documents and the option to write to MFRS with feedback.	Not applicable ☐
		What is the actual or potential impact on disability? In relation to learning disabilities, the language usually used in MFRS documents (despite aiming to write in plain English) could exclude some people. The production of an easy read version is intended to address that.	Not applicable ☐
		What is the actual or potential impact on gender identity? No impact anticipated	Not applicable ☐
		What is the actual or potential impact on gender reassignment? No impact anticipated	Not applicable ☐

	should be the case please tick the not applicable box.	What is the actual or potential impact on marriage and civil partnership ?	Not applicable ☐
	If there is no impact , please state that there is no impact.	No impact anticipated	
		What is the actual or potential impact on pregnancy and maternity ?	Not applicable ☐
		No impact anticipated	
		What is the actual or potential impact on race ?	Not applicable ☐
		It is not anticipated that there would be specific impacts related to race as such, but stakeholders for whom English is not their first language would be impacted by a document that is only in English. However, an easy read document will help for some people, as will the use of Recite Me on the MFRS website. The document also contains details about how to ask for copies in other languages.	
	What is the actual or potential impact on religion and / or belief ?	Not applicable ☐	
	No impact anticipated		
	What is the actual or potential impact on sex ?	Not applicable ☐	
	No impact anticipated		
	What is the actual or potential impact on sexual orientation ?	Not applicable ☐	
	No impact anticipated		
	What is the actual or potential impact on Socio-economic disadvantage ?	Not applicable ☐	
	People from a more socially deprived background are less likely to be active online, therefore the steps taken to address the challenges associated with older people being able to access the consultation are also applicable to people in socially deprived areas.
