

# SAVE WEST KIRBY FIRE STATION SAVE GREASBY PUBLIC LIBRARY SAVE UPTON FIRE STATION

We were shocked to hear of the proposed closures of West Kirby Fire Station and of Upton Fire Station.

The demolition of Greasby Public Library, to make way for a new, £2.8 million fire station at Frankby Road, Greasby, is completely unacceptable.

We urge Merseyside Fire and Rescue Authority (MFRA) to cancel all plans to close West Kirby Fire Station and Upton Fire Station. We call on MFRA to make available to the public details of MFRA financial reserves including valuations of assets and of 'cash at bank and in hand', since MFRA is relying on financial arguments to justify fire station closures.

Wirral Metropolitan Borough Council should oppose any plans to demolish Greasby Public Library.

The Council should make sure that as many West Kirby residents as possible are able to participate in any future decision-making, concerning the future of all fire stations and public libraries. Members of the public are entitled to participate in environmental matters when all options are open and when public participation can be effective (Google: the Convention on Access to Information, Public Participation in decision-Making and Access to Justice in Environmental Matters, also known as the 'Aarhus Convention'). The Aarhus Convention requires public authorities, like MFRA and Wirral Metropolitan Borough Council to act in an open, transparent and fair manner. We call on MFRA and Wirral Metropolitan Borough Council to do so.

We are also opposed to plans to build a 260,000 square feet shopping mall, together with a multi-storey car park known as the 'Greater Concourse Project' (google: 'West Kirby.renewal', for details).
